IniSwap

INTRODUCTION

IniSwap is a decentralized exchange (DEX) for swapping BEP20 tokens on Binance Smart Chain. IniSwap uses an automated market maker (AMM) model where users trade against a liquidity pool. Such pools are filled with users' funds. They deposit them into the pool, receiving liquidity provider (or LP) tokens in return. They can use those tokens to reclaim their share, plus a portion of the trading fees.

<http://iniswap.finance>

Iniswap

INTRODUCTION

The LP tokens are called FLIP tokens. Iniswap also allows users to farm additional tokens like INI. On the farm, users can deposit LP tokens, locking them up in a process that rewards users with INI. Users can stake INI tokens to receive different token on Binance smart chain, which will have further functionality.

INTRODUCTION

IniSwap helps you make the most out of your crypto in three ways:

Swap , Earn, and Invest

Iniswap

<http://Iniswap.finance>

INTRODUCTION

SWAP

Instantly swap crypto tokens: no registration or account needed.

IniSwap

<http://iniswap.finance>

INTRODUCTION

The people's choice

IniSwap is the leading decentralized exchange on
Binance Smart Chain, with the highest trading
volumes in the market

INTRODUCTION

LOW FEES

Why pay more?

IniSwap runs on Binance Smart Chain, a blockchain with much lower transaction costs than Ethereum or Bitcoin.

Trading fees are lower than other top decentralized exchanges too, so that's a sweeter for you!

<http://Iniswap.finance>

INTRODUCTION

Decentralized

Trade directly from your wallet app.
Unlike centralized exchanges like Binance
or Coinbase, Iniswap doesn't hold your
funds when you trade: you have 100%
ownership of your own crypto.

<http://Iniswap.finance>

INTRODUCTION

Earn

Earn INI and other tokens for free with super high interest rates.

Earn tokens with INI Pool

Stake INI, earn free tokens. It's really that easy. INI holders right now are earning tens of millions of USD worth of free tokens each week from major projects.

New projects join the party every day, so you can earn more, for even longer.

<http://Iniswap.finance>

INTRODUCTION

Earn INI with Yield Farms

Stake LP tokens, earn INI. You take on a little more exposure to market fluctuations than with the Syrup Pools, but can earn higher APR to offset the risk.

Earn Trading Fees

No farm? No problem. Even if your trading pair isn't supported on the Farms page, you can still earn trading fees when you stake your tokens in Liquidity Pools (LPs).

INTRODUCTION

Invest

IniSwap makes making money fun. Invest your money for future generation

Lottery

Millions of dollars regularly go up for grabs on the Iniswap Lottery. Join as many as 11,000 daily players for your chance to win big!

NFT Collectibles

Win collectible NFTs for participating in trading competitions and more fun & games.

<http://Iniswap.finance>

INTRODUCTION

Prediction

Win INI if you can predict whether the INI price will rise or fall. New rounds every 7 Days!

<http://Iniswap.finance>

INTRODUCTION

Safety

Transparent

- We're built on open-source software: our site and all our Smart Contracts are publicly visible for maximum transparency.
- Our contracts are verified on BscScan so you know that what you see is what you get:
Security best practices
- The chefs use multisig for all contracts
- Our contracts' time-locks give you peace of mind.

Iniswap's Unique Features

Meaningful Redistribution

The current DeFi market is dominated by bots, traders, and noncommittal speculators. However, at IniSwap, we believe the token holders should own all the benefits of the protocol. That's why we've implemented a unique structure of low fees, buyback and burning mechanism. These are meant to perpetually increase the value of INI (INI governance token, offering access to token presales) and IniSwap farming token and reward the active platform participants.

To be more specific, the IniSwap trading fee, one of the lowest on BSC – if not the lowest – is only 0.20%. 0.14% of that 20% goes to the Liquidity Providers (LP). The remaining 0.06% is used to buy INI and burn it. We do this every TIME.

So when a buyer considers where to swap tokens, he might remember that not only does IniSwap have the lowest fees, but if he is holding INI, those fees are going right back into his pocket. Additionally, IniSwap farms have no deposit fee, no withdrawal fee, and no performance fee, unlike the majority of our competitors. Just yields, for 100% profit.

INI token holders also benefit from the IniSwap philosophy. There is a 0.20% lock fee for external projects that lock their liquidity in INI Locker, which is used to buyback INI.

RISKS

Although we take a multitude of safety precautions and Vault is audited, farming and participating in DeFi comes with certain risks. Below, we discuss the potential risks associated with using Vault.

RISKS TO YIELD FARMERS

- We take a multitude of safety precautions. Vault is an audited program. However, farming and participating in DeFi comes with certain risks. Below, we discuss the potential risks associated with using Vault.
- Impermanent Loss (IL):

RISKS

- Risk of (impermanent) capital loss from asset re-balancing in the Automated Market Maker ("AMM") pool.
- Stablecoin pairs can be subject to impermanent loss, if the price of at least one moves off peg. In general, the Impermanent Loss (IL) from this movement is small and transient. Historically, however, there have been instances where stablecoins have stayed off-peg for extended periods of time. By opening a position with large leverage, you are also amplifying the potential IL on your principal.
- Impermanent loss is not unique to IniSwap Finance. It is common among all yield farming and AMMs. While it's not possible to completely mitigate IL, users can choose to yield farm asset pairs that have high correlations to minimize potential IL. For more information on IL, you can start with this article.

RISKS

Smart Contract Risks

Risk:

While the majority of our smart contracts have been audited by multiple third-party firms, they could theoretically have vulnerability

"While we do our best to eliminate all the possible risks, DeFi is an industry where events that no one predicted can occur (the dreaded black swans). So please don't risk assets you cannot afford to lose. We work tirelessly to protect your money. You should do the same."

GOVERNANCE

As we aim to become a 100% community-driven protocol, Governance will decide all the important decisions. There are no VC firms or private interests here. If the community does not approve of our work and submits a proposal, we can even transfer the Developer Keys to a better developer. It's that simple.

Every INI staked in our staking contract will give you the same amount of votes in our governance contract. The votes can be used to decide further developments and changes to the protocol. That's the model we believe in.

Iniswap's NFT Marketplace and Metaverse.

Our new global marketplace will become the premier destination for NFTs and digital collectibles across mediums, from visual arts and gaming to music and sports.

We aim to create the most compelling metaverse with one-of-a-kind offerings and exclusive collaborations, paired with a seamlessly designed and intuitive digital platform to bring together artists, creators and crypto enthusiasts from around the world.

Furthermore, Iniswap NFT will share the same account system as iniswap.finance, allowing users to access the marketplace alongside our other ecosystem offerings.

Bringing You World Class NFTs, Exclusive Collaborations and Hype-Worthy Exhibitions
